PROJECT

MINI-PROJECT - SMART STREET LIGHT SYSTEM

Engineered and deployed an IoT-driven smart street lighting system, automating operations through sensor based inputs and embedded systems, resulting in a 30% reduction in energy consumption and improved operational efficiency by 20%.

Led and coordinated with a team to design and integrate electronic circuits, microcontrollers, and sensors, facilitating efficient data acquisition and optimizing control of street lights, resulting in a 40% improvement in system responsiveness and 25% increase in data accuracy.

PROJECT - WOMEN SAFETY AUTOMATIC DRONE WITH TRANSFERRING SIGNAL USING IOT

Designed an autonomous drone to enhance women's safety using IoT, AI, and GPS for real-time threat detection.

Enabled automatic distress signal transmission with live video streaming and two-way communication.

Improved emergency response by eliminating manual activation, increasing mobility, and enabling faster, proactive safety measures
